Calgary, Alberta

PROFILE

I take projects from **brand identity through to production code** — logos and guidelines, interface design, and React/TypeScript builds with real API integrations — and I ship them. Comfortable owning the whole arc with a client: scoping, iterating on feedback, explaining technical decisions to non-technical stakeholders, and supporting the work after launch.

EXPERIENCE

Creative Director & Web Developer · Kon'ya Japan Contract · May 2025 – Feb 2026

- Directed the brand from the ground up: designed the logo and a complete brand guideline so the identity holds together across digital and print.
- Designed and built the production website in React and TypeScript, deployed on Vercel, with Clover API integration for live business functionality.
- Worked in iterative, feedback-driven cycles with the owner and an API developer — scoping requirements, flagging blockers early, and translating technical decisions for a non-technical client.
- Tested responsive layouts across devices and browsers before every deployment and supported the site through launch — domain, deployment, forms and third-party integrations.

Freelance Web Developer · FuwaFriends

Oct 2025 – Jan 2026

- Debugged and resolved front-end and checkout workflow issues in a live ecommerce store, improving usability and the customer experience.
- Gathered requirements directly from stakeholders, prioritized fixes, and kept responsive design and brand consistency intact.

Technology Instructor · Hai Nan Community Association

Jun 2024 – Sep 2024

- Taught older adults to use smartphones, laptops and tablets one-on-one with patient, step-by-step guidance — including helping Chinese- and Vietnamese-speaking participants through translation apps and language settings.

SELECTED PROJECTS

myronfeliciano.com — Portfolio

2026

React · Vite · GSAP · Canvas · GitHub → Hostinger auto-deploy

- Designed and built this site end to end — split-text hero reveal, pinned horizontal gallery, mouse-reactive particle field, custom cursor and a brand-guideline-style frame with live section numbering — with continuous deployment on every push.

Secure Authentication System

Jan 2025

Node.js · Express · MongoDB · JWT · Google OAuth · AWS

- Built a full-stack auth system with CSRF protection, Helmet and HTTPS practices; tested endpoints, token refresh and protected routes in Postman; deployed and configured on AWS.

Headless CMS Integration

Feb 2025

React · Vite · Sanity · REST

- Connected a React front end to Sanity CMS via REST; chose Vite over Next.js deliberately to understand build-tooling differences and sharpen debugging.

Authentication SDK — team project

Feb 2025

Git · shared codebase

- Led development for a scalable authentication solution, coordinating tasks and version control across the team.

SKILLS

Design & direction

Brand identity, logo design, brand guidelines, art direction, UI/UX, responsive design, motion design, Figma

Front end

React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, GSAP, Vite, Next.js

Back end & platforms

Node.js, Express, REST APIs, MongoDB, SQL, Java, C#, Sanity, Contentful, Clerk, Shopify, Squarespace

Tooling & delivery

Git, GitHub, Postman, AWS, Vercel, Hostinger, cross-browser & cross-device testing

EDUCATION

Diploma, Web Design & Development

Southern Alberta Institute of Technology (SAIT)

Calgary · Graduated Aug 2025 · GPA 3.7

HOW I WORK

GROUNDED

MODERN

CREATIVE

ADDITIONAL EXPERIENCE

- Customs Coordinator**, Pacific Coast Express · Sep 2025 – Jul 2026. Resolved time-sensitive shipment and documentation issues with customers, drivers and internal teams in a deadline-driven environment.
- Retail & hospitality**, 2017 – 2024. Six years customer-facing at Vans / Jack & Jones (Employee of the Month, multiple times) and Boston Pizza — calm, precise and fast under pressure.
